

Eliminate Outsourcing Risk With Invest | Pro™ Fund Pricing Oversight

Regulatory
Risk

Financial
Risk

Reputational
& Brand Risk

Invest|Pro™ is your risk control centre for outsourced functions.

Satisfy your responsibility to oversee outsourcers and their functional processes on your data.

The **Invest|Pro™** fund price validation framework identifies exceptions, swiftly categorises and recommends corrective action according to the severity and impact of the alert. **Invest|Pro™** is your risk control centre for outsourced functions to oversee Regulatory, Financial, Reputational and Brand Risk.

Invest|Pro™ Oversight

Automation, Validation
& Exception based

Interactive Data
Visualisation

Auditability

Intuitive UX
& Scalability

Investment Mandate
Compliance

Summary functionality

- ✓ Users can “Enable” or “Disable” rules, set the rule severity, edit rule conditions to change lower-bound and upper-bound parameters, add comments to rule exceptions, update exception message.
- ✓ Analysis of exception numbers generated per rule and the rules and exception severity in real time.
- ✓ Prioritising the most impactful issues to be investigated and corrected first.
- ✓ Set to ‘stop down-stream processes’ for severe exceptions

Here are the sample datasets required for the oversight of the above exceptions and rules checks:
