Financial Risk Solutions' Investment Administration Software. Developed by actuaries since 1999 and now deployed in the cloud on Microsoft Azure.

MICROSOFT AZURE PROFILE: Financial Risk Solutions (FRS) www.frsltd.com

Financial Risk Solutions Ltd. (FRS) licenses unit pricing, investment fund administration, governance, risk and compliance software to major life insurance companies as well as to a range of outsourcers in Europe. Clients include MetLife, Zurich, Aegon, SEB, Charles Taylor, IFDS, Accenture and Capita.

WHAT WE OFFER

Invest|Pro™ securely automates complex fund administration processes such as daily unit pricing/NAV's, asset/liability unit matching, box and trade order management, investment accounting and tax and financial reporting - all in a single application. Invest|Pro administers unit linked funds, shareholder funds and with-profit funds.

Invest|Retail™ is a self-service, white-label web application that allows third parties secure online access to the Invest|Pro™ application. Invest|Retail™ empowers clients to invest how and when they want and allows advisors to manage their purchase and sale requests and view valuations and transactions live.

Invest|OPS™ (Outsourcing Partner Supervision) automates the validation of operational activity performed by outsourcing partners, enabling investment firms to supervise outsourced functions and to manage the associated risks. It also provides clients with effective access to the data associated with the outsourced activities.

Invest|GRC™ (Governance, Risk and Compliance) is an asset reporting and analytics tool for producing regulatory and risk management reports. It consumes data and empowers senior finance, risk, audit, ops and admin staff to monitor risk, manage rules and breaches and produce Solvency II Asset QRTs.

WHAT OUR CUSTOMERS ARE SAYING

"Using Invest|Pro™ has allowed us to more than double our funds under management and extend our range of funds without any increase in staff." – Adrian Swales, CEO, Mobius Life

"We chose Invest|Pro™ to automate and consolidate our administration functions and the 35% cost savings and efficiencies that have resulted have been exceptional." - Ms Oonagh Sower, Head of Group Finance, Friends First

Microsoft | Go-To-Market Services

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS
Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE
Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC
Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE
Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

MEDIA
Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL
Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE
Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES
Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH
With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
